YESTERDAY Messrs, Stewart and Whitereceived in Ely District, preparatory to shipping the same to Carson. They place on each specimen the name of the donor, the mine, the assay value, and the mining district from which the specimens come. By this method every one presenting the Commissioners with specimens will be represented in the great Centennial Exhibition—and it is also a good way of showing to the world at large the mineral resources of Nevada. large the mineral resources of Nevada.

YESTERDAY two "sole traders" had a wordy dispute on Lacour street in reference to which was the best fighter of the two. The argument was ended by one rushing in the house and closing the front door in the face of the other, much to the disgust of a lot of the "boys" who were waiting anxiously to see it come to blows. We regret that they were disappointed, as it would have made a good local item, and they are scarce.

A PROMINENT citizen has made three wagers on the result of the Brooklyn imbroglio: First, that the jury fail to agree; second, that Beecher is retained by Plymouth, even should a verdict be given against him; third, that Beecher's sarary will be raised, no matter how the verdict goes. He talks some of obtaining a monopoly of the telegraph line for a few days, and after learning the result, make up his betting-book accordingly.

To-mourt Professor W. Frank Stewart, by request of many of our citizens, lectures at the Court-house on the subject of "Ethnology" or "Animal Types," a theme that is very interesting. As his previous lectures have been of so much interest to the public, it is to be supposed that this will not be inferior to them, and that it will attract a large audience.
